Atkinson's Saturday Evening Post

AND BULLETIN;

A FAMILY NEWSPAPER, DEVOTED TO LITERATURE, MORALITY, SCIENCE, NEWS, AGRICULTURE AND AMUSEMENT.

Bulletin, No. 289. PHILADELPHIA, MAY 18, 1833. Vol. XIII.—Whole No. 616.

PUBLISHED EVERY SATURDAY.

By Samuel Coate Atkinson,
No. 12 HUDSON'S ALLEY,
A few doors South of 116 Chestnut street.

TERMS—$2 50, if paid during the year.
$2 62½, if paid in advance.
$3 00, if not paid during the year.
$1 25, for six months.

Papers discontinued only at the option of the publisher when all arrearages are paid.

☞ Should any of Sanford Bartlett's subscribers in South Carolina, Georgia, Alabama, Florida and Louisiana, forward us our claim for subscription, &c. he may do so.

ORIGINAL.

NAPOLEON'S CAMPAIGN IN RUSSIA.

Audacious foe! the conqueror's eye,
And laurels bound to his car,
Bright genius of steel o'erspread the plain,
And glory sigh'd the warlike train.
"Arouse, arouse ye gallant bands,
Vive Napoleon!" the conqueror said,
"And all those fields, whose hoofs the Cossack tread,
Fame's house in me, that warlike advance."

"Soldiers, darken'd our glorious fame,
The valour of your ancestors,
And may no Frenchman mist his grave
Unknown so fervent of the town?"
For children's warrior sentiment's field,
From Wilno to Smolensko's field;
And there the sons of conflict set,
And saw Napoleon victor yet.

For Borodino's field of arms,
Where bravest blood at every pore,
Revealed, that there the cannon's breath
Decided Moscow's life or death.
Oh! awful was that field of death,
Strong heroes perished in their might,
And men and horse, and sword, and shell,
In one destruction rush'd to hell.

Swift cannon shot, in whirling force,
Divided armies in their course,
And blood, and smoke, and shout and cry,
Deafed the earth and filled the sky.
The wheel of carnage onward rolled,
The Sun withdrew his flaming gold,
And then the conqueror's blazing light,
Shone brilliant in the shades of night.
The horrid work of strife had ceased
For meeting millennial's to the east—
The Russian host after retired,
And left the field the French desired.
Soon Moscow of its fate was known,
Seized in the hue of solar rays;
In all the charms that are around,
The smoke, the flame, the sun's ease and pride.

But oh! what soul-freezing gloomed,
When wrapt in flame, for Moscow seemed
An awful sea of vivid fire,
That kindled every lofty mire.
That flood of doleness burst,
Deprived the conqueror of his power;
To boats, that never knew retreat,
The unchained defeat.

And that retreat, in winter's ire,
Destroyed all of war and host,
Laid generals, heroes, soldiers low,
In shrouds of dense and freezing snow.
Of all that storming band,
But few retrieved their native land,
The rest retained their bone and breath,
And every valour slumbered death.

O ye, that stare to war and strife,
To scorn the horrors of human life!
To bathe in blood a gentle plain—
To ruin empires for your gain—
Beware, beware,
Nor prosper better your retreat.

For the Saturday Evening Post.

FLORIDA.

There is, probably, no section of the settled part of the Union or her territories, of which less is generally known by the generality, than of Florida. Her very peculiar geographical position, and her consequent [illegible] from the opposite in manners, laws, and villages, have heretofore kept the Americans from visiting it. But Florida is now fast becoming to wider a theme—her territory has been touched with the spear of American enterprise, and is now ready to blossom; she is fast putting off the sable of her widow's weeds and preparing to take her place at the head of the table of a new family. Florida is at least 500 miles in length, and in mean breadth 120. Of her soil, climate, and local divisions of East and West Florida, no longer exist. West Florida is annexed to our new government, which will probably soon have sufficient population to claim admission into the Union of the States. Young Miami has lately risen in East Florida, and commands a

entirely depopulated and laid waste; the barbarian changed its direction, and destroyed some other villages. *Near* Gerbini and its inhabitants were also destroyed. On the 23d of March, the stream of lava was in some places two miles broad, and extended itself to the village of *Mezzakoro*. On the day a new gulf was opened, from which arose discharges of sand and stones, which formed a hill with two summits, two miles in circumference, and 100 metres high; these consisted of stones of different colours.

M. Hoad went down into one of the openings of this mountain with torches, but could not reach the bottom, and was obliged to go over three or four of the extreme walls. The cavity is of an oval form, and the opening through which he descended was one of the lowest; it was inclined to think that the crater where it was formed had been probably the first to adopt its use. Astere, written in 1645, from Constantinople, by Prior de Vilain, a Frenchman, enquiring in correspondence with the writer's intention of changing home to Italy soon rallies, which he replies at an article unknown to his own country. Thirty years after this, some gentlemen brought with them a supply of this honey, together with the seeds and roots of the plants which produced it, when it until 1671 that the first house was opened in order to make use of the prepared honey.

S. E. Post and Bulletin.

Saturday, May 18.

KNOXVILLE.—An election for officers of the district of Kensington, was held, by the Board of Commissioners, on the 2d inst., when the following named persons were chosen:

Thomas Dick, Superintendent of Highways.
John Taylor, Treasurer.
Richard Hamilton, Assessor.
Charles Gallahan, Solicitor.
Thomas Hamilton, Registrar.
John Snyder, Superintendent of Poles.
Samuel Bench, Messenger and Door Keeper.
Samuel Bench, Messenger and Door Keeper.
Messrs. Gallahan, Michael Fisher, Jacob Dungan, Thomas Quinton, and Daniel Fisher, on a committee from the Board, were appointed to superintend the erection of the new Town Hall.

FRANKFORD.—An election for Borough officers, was held on Monday, the 4th inst., and resulted in the choice of the following gentlemen:

Chas. Wm. Ashmead, Esq., Burgess.
Philip Bissinel, Esq.
Abel G. Thorn,
William Shallcross,
Jacob Peters, *Assistant Burgesses.*
Samuel Waldring,
Daniel Stewart,
P. Slaughter, High Constable.

PITTSVILLE stands about ninety miles north west of Philadelphia, on the right bank of the Schuylkill. Its situation is beautiful, and has the most extensive water power of business, possesses an unusual degree of enterprise, and has grown up within, as it were, a dozen years have transpired since a wilderness gave place to the present city. In that period it has risen to contain more than 3,000 inhabitants; its respectable and handsome, and its business is substantial. There are one hundred and twenty-seven houses on the principal street, and fifty-four on the cross streets already finished. The chief trade of Pottsville is derived from the Schuylkill coal trade, and the prosperity of the town, and render the town a very hive of hustle and activity.

GOLD GROWING.—The farmers of Pennsylvania are a practical world, and not given to poetry or romantic vegetation, and great benefits have realized therefrom, as they have in the people of Georgia are beginning to profit by the *accession* of their eastern brethren—the discovery of gold. Many of the farmers in Habersham county, we are informed by letter; it is the gold deposits, which the farmers are now engaged in working with success. Some of them are making from $5 to $10 per day, and the yield is increasing as the deeper veins are reached. The chief trade of Pottsville is derived from the Schuylkill coal trade, and the prosperity of the town, and render the town a very hive of hustle and activity.

The summit of *Etna*, surrounded with large masses of lava, is exhibited in plate ii. A. A. A. represents the edge of the basin of Etna, which issued from the upper crater. B. B. is the circumference of the crater, with its cleft, C. C. through which the liftreal part is discernible. D is the flat bottom of the crater, and E. the aperture in the bottom, from which the larger column of smoke F. F. rises in a white pyramid, though it was at one side of the bottom, is, for the greater distinctness of view, represented in the middle. G. G. is that part of the edge of the crater from which its internal form is discernible, and where the design of it might be most conveniently taken. H. H. is the smaller column of smoke to the north-east.

The numerous caverns that are met with in different parts of Sicily afford a singular kind of dwelling. One of these, in the city of Girgenti, which is described by Mr. Hoad, is capable of containing 30,000 persons. One of these caverns, which contains the name of Proserpine, from its being supposed by the ancients, that the fabled story of Pluto conveyed her into his dominions; on which occasion Ovid introduced the following address to the goddess:

"Hail, Proserpine, the queen with whom the gloomy king of hell delights to dwell, and who, as the wife of Pluto, is entitled to share his throne."

The Emperor Nicholas has erected to the memory of his brother, the late Emperor Alexander, a most magnificent monument of red granite. The pedestal is forty-five feet high—the shaft is one piece of granite of the largest and purest red dimensions ever seen. It weighs a hundred tons. The whole monument is sixty-five feet in height.

Samuel Bolton, who was both a poet and a clergyman, thronged his brain so much by excessive study, that he ordered a coffin to be made for him, and kept him in his room, and, on the occasion, he always shunned the sight of the narrow case. Being at length worn out with a continual round of reading, he put his head into it, and by throwing himself into a sweat, he died.

EXTRAORDINARY FREAK.—In the Vienna paper we find the following singular story. A bystander, disgusted with life, was a setting out for the other world, respecting the manner in which he should open him. He obeyed, and on entering the room of the unfortunate man, found him dressed as a soldier. On his head was placed a leg of gold, a pair of pistols, and a rope. He was asked by the man why he thought of accompanying him for a service he had to acquire of himself. He replied that he was a person it, if he would not do it voluntarily—the service was to hang the person with the rope which he had in his hand. He complied for that purpose; besides which a large quantity of powder was put in the room, which at the appointed time he wished to be exploded. At last, the gentleman who had undertaken the service, and the singular request; but receiving money, expressed his willingness to comply with what was his request, and set to work making preparations, such as taking off his coat, &c. He then proceeded to tie up some of the worst of the room, which the latter willingly assisted him in doing. He preliminary to it in all directions. The executioner, however, so manner he fastened the rope around, that he allowed the person to be at the house, and the hypocondriac was sent off in a hurried manner.

Gold has been a scarce metal of remarkable sounds heard in the house. At the time of the fire, a person went to hear a mysterious sound off the coast pre-, which appeared to proceed from the cellar. He was reluctant to descend cellar, but believe it to come from the spirit of the house, and that it was a warning given by the coming storm, whistling through the crevices of the cellar windows, which are very near the ground on the Outlook coast. So much do the people consider the influence of supernatural agency, that no one can be persuaded to venture out to see while the warning wind is blowing.

In 1790, Prince Maurice, of Nassau, took Breda by the following stratagem: He had a number of men secreted in a turf, under which 30 men were concealed, the Spaniards were accustomed to bring in the turf for the Maréchal's fire, a Lieutenant of the 70, not being able to suppress a curiosity, stopped the cart, and found what was in the enterprise should be frustrated by so inconvenient a circumstance.

The wheat, found buried in Egyptian sepulchres, where it had stood for thousands of years, is commonly regarded as one of the most surprising of the evidences of the permanence of the vegetable race; and it may be well to mention, that at the Museum of Practical Geology, in Jermyn street, there is a specimen of this wheat, which was presented to the museum by one of all the experiments of the workmen carrying along with them a few grains of this ancient grain, germinated and rendered abundant.—*Hardwicke's Handbook.*

ANCIENT GOLF CLUBS.—Mr. Hutchinson, in his work on the sports of the palace feeding at young with the bones of people in Egypt; and to this belief he has added the custom of burying in the tombs of the dead with them, together for the use of the unpaid animal, which, according to the belief of the Egyptians, would be useful to them in the next world. Among the young ones of the flock of the tomb of their proprietor, and the lower part of their bodies was a small piece of wood, and the whole of the substance that these finely formed clubs were composed of. It is a red fluid as closely resembling it, that the difference cannot be perceived.

An ancient Roman has calculated that about the Assembly of the New World 3,241 millions of Asses (two and pence), and 1,620 lives to the Cube of Good Hope, have been transplanted into England, and that those being added to the introduction of cannon from China, the East Indies, New Holland, and other parts of Asia and Africa, and the continent of Europe, from the various cultivated plants which for the most part, numerous climate of Europe has been furnished, amount to 720,000.

The Russians are generally robust and hardy; the females are well looking. Long beards are much worn; such seems to be the fashion in giving way. Shoemakers, who sell wood leaving out more pockets than they form a great part of the dress of the peasantry, and the 100 coats of high dress consisted of nieces of different colours.

M. Hoad went down into one of the openings of this mountain with torches, but could not reach the bottom, and was obliged to go over three or four of the extreme walls. The cavity is of an oval form, and the opening through which he descended was one of the lowest; it was inclined to think that the crater where it was formed had been probably the first to adopt its use. A letter, written in 1645, from Constantinople, by Prior de Vilain, a Frenchman, enquiring in correspondence with the writer's intention of changing home to Italy soon rallies, which he replies at an article unknown to his own country. Thirty years after this, some gentlemen brought with them a supply of this honey, together with the seeds and roots of the plants which produced it, when it until 1671 that the first house was opened in order to make use of the prepared honey.

Epitome of the Times.

The most favorable and authoritative testimonial has been borne to the efficacy of the Vapour Bath or Mr. Wright, in George street. This remedy receives in importance to such baths, and the want of them was thereby sensibly felt. The desideratum is now well supplied.

A DUCHESS OF SPEED.—The U. S. Gazette prints a brief list of Mercury poisoned from Mexico, which is of a high fine quality, with skins as delicate as the cheek of beauty, and as transparent and as yielding.

One of the Sound in the Sunday of the Fairmount Water Works, find that was

LOVE'S TRAGIC LOT.—A "screaming good" incident occurred in Boston, the other night, before a theatre nearly an hour, were politely informed by the constable that the house was "nobody lived there."

Our subscriber, R. F. Owen, who recently eloped from Lexington, Ohio, informed that it will be employed out of our power to supply him with the S. E. Post until he informs us with his present location. When writing, please recollect the subscription dies and unpaid.

$100 is offered as a premium by the Franklin Institute, Philadelphia, for the best plan to prevent the casting of gratuitous tickets. Those who receive the gains, without assigning power or space—Decision to be made in December next.

11,587 tons of Lehigh coal were received in Philadelphia, during the week ending.

The People's line has reduced the steam-boat fare from New York to New-Brunswick, to One Dollar. From Princeton to Philadelphia the fare is $1.

If the gentleman who, on the 4th inst. left his overcoat at the Washington Hotel, Reading, will call and pay charges, he can have it.

A full length portrait of Gen. Jackson, was stolen from the State Museum, Boston, on the evening of the 7th inst.

During the violent thunder storm, which passed over Philadelphia, on Thursday afternoon last, the house of Mr. Washington Osgood, was struck by lightning and entirely consumed. The furniture, bedding, &c. contents of boy were consumed.

A letter dated Negro Jefferson, belonging to a boy engineer, now lying at Baltimore, committed suicide on Thursday night by cutting his throat with a razor. It is said that his motive for some days previous was very much depressed, but that he was free from fear and future disposition, the reason of his depression could not be ascertained.

The Southern Times, mentions that Mr. Mallory, a young gentleman, of Charleston, S. C. died suddenly, on the 1st inst. from the effects of a wound received in a combination, after death, a large tumor was found growing from his head, which had been the cause of his sickness his death.

The Rev. Dr. Bethune of MEDFIELD HOLMES.—In an advertisement in one of our exchange papers, we find a young lawyer advertising for a wife, and in the same breath a

A man in Baltimore by the name of Peck, has been convicted for stealing a *lady's* bustle.

The Lowell Rail-road has commenced operations—it has not broken a boy's leg.

A simple plan of having heated water in any part of a house, is suggested in Dr. Lardner's Treatise on Heat. A pipe from a boiler, may be carried in a circuit up to any requisite place, will, if the end be immersed in water, rapidly impart heat to the whole heat of the vapor.

Mr. Washington Black Hawk, the editor of the Kentucky Commonwealth mentions as an ox, that "Black Hawk finally made the full moon, and was brought to him to take up arms, and which was the last of a series of rejoicing, was the source of a very good time."

Further particulars.—The appearance of the wounded Indian chief, when brought to the camp, excite resistance to the assault of his destroyer. After the first moment involuntary feeling of pity and respect were deliberately, to rescue and offer the whole attention of the party, which was immediately opposed. What he could not carry away, he stowed away in the hollow trees, or buried in the earth, under the burns, in making his escape, he breathed, at a favorable time, a message to his people. The last language was so unintelligible that the only word he could distinguish was Kenapacomaqua, the name of the town in its proceeded on his way, very quickly, until his death.

Plunder seems to have been the only inducement to the attack upon the camp. Not a single scalp was taken, and the prisoners declaring afternoon, between Mr. Boyd and Mr. Lamb, the former was killed, and the latter escaped, by the fleetness of his horse, after receiving a severe wound in the shoulder.

The train back on the Baltimore Central Course on Monday last, was thrown off the track by a rock, $1000, was run with steam by the former. Time lost on the line, about 2 hours.

The train belonging to Mr. Peter Heck, of St. Clair township, Schuylkill co. Pa. was destroyed by fire on Thursday of last week, and entirely consumed. There was no insurance. The property of Mr. Heck, the barn which was totally destroyed—two calves were killed by the flames.

The new prize comedy, entitled the *Foundling of the Sea*, which received the prize offered by Mr. Forrest, was produced last evening at the Park Theatre. Zeke Hill Dickens plays the principal character, and a genuine treat was anticipated by full.

We learn from Canada papers, that the extensive tannery of Mr. Gilmour, at Rochester, about 20 miles on the Yamaska river, was entirely destroyed by fire, on the morning of the 4th inst. The fire originated in was one of the largest tanneries in the country, and contained a large quantity of leather, a portion of which belonged to a gentleman in Montreal.

The Court Common Council have appropriated $1000 for the relief of the sufferers by the late fire in Pearl street, and the Board of Assistants have concurred.

At Montreal, on the 11th inst., a man named Williams, of Swanton, Vermont, was charged, and was attacked by three villains and beaten so severely, that he died on the next day. The murderers had just been liberated from prison.

The Rev. Mr. Hawks, of Boston, has left the pulpit of the Advocate of New York, with more money in their pockets than they had when they came to Boston.

At the Court Garden Theatre, London, young Kean's pleasing figure in the Duke of Milan. The Duke burst with great spirit, but he gave way and was compelled to leave the stage.

The New York Journal of Commerce shows that the yield of wheat in every part of the country, for the last 13 years, would supply a count in Europe for 6 months, and for a fair crop. The quantity imported is 214,434,382 gallons.

Lloyd's Register contains an account of a recently launched ship of the name of the Great Britain, which weighs only 10 pounds, and costs but $5. It is worked by a single man, who, by the aid of machinery, discharges it managed to work together—such machinery as would require the labor of 100 men to perform the stockings per day.

The Rev. Mr. Bolland set in the Nun Pine Court here, on Monday, ær 16 hours, without intermission, and was then in full vigor.

Dr. Ascensionis landed at Calais, a few days ago, from London, having made the passage in a small boat, in sixteen hours, about 27 years of age, was drowned by a dog, which was in the boat with them, getting upon his shoulders, and pressing him under the water.

It has been proposed at Weenmar that the Jews should be sent to the Island of Madagascar, and there set up Saturdays.

The Rhode Islands declare that the Church Reform proposed by Ministers is horrible to contemplate. Col. Sibthorp says that it will be looked upon by Europe with contempt.

Mr. Fraser, earning a destructive fire broke out in Troy, N. Y. on Monday morning, which destroyed at the corner of River and Fourth streets, and spread with tremendous rapidity to the interior, and in several adjoining, involving a loss of $150,000, were covered.

A full length portrait of Gen. Jackson, was stolen from the State Museum, Boston, on the evening of the 7th inst.

At the Court Garden Theatre, London, young Kean's pleasing figure in the Duke of Milan. The Duke burst with great spirit, but he gave way and was compelled to leave the stage.

The New York Journal of Commerce shows that the yield of wheat in every part of the country, for the last 13 years, would supply a count in Europe for 6 months, and for a fair crop. The quantity imported is 214,434,382 gallons.

Lloyd's Register contains an account of a recently launched ship of the name of the Great Britain, which weighs only 10 pounds, and costs but $5. It is worked by a single man, who, by the aid of machinery, discharges it managed to work together—such machinery as would require the labor of 100 men to perform the stockings per day.

The Rev. Mr. Bolland set in the Nun Pine Court here, on Monday, ær 16 hours, without intermission, and was then in full vigor.

Dr. Ascensionis landed at Calais, a few days ago, from London, having made the passage in a small boat, in sixteen hours, about 27 years of age, was drowned by a dog, which was in the boat with them, getting upon his shoulders, and pressing him under the water.

It has been proposed at Weenmar that the Jews should be sent to the Island of Madagascar, and there set up Saturdays.

The Rhode Islands declare that the Church Reform proposed by Ministers is horrible to contemplate. Col. Sibthorp says that it will be looked upon by Europe with contempt.

Mr. Fraser, earning a destructive fire broke out in Troy, N. Y. on Monday morning, which destroyed at the corner of River and Fourth streets, and spread with tremendous rapidity to the interior, and in several adjoining, involving a loss of $150,000, were covered.

A full length portrait of Gen. Jackson, was stolen from the State Museum, Boston, on the evening of the 7th inst.

During the violent thunder storm, which passed over Philadelphia, on Thursday afternoon last, the house of Mr. Washington Osgood, was struck by lightning and entirely consumed. The furniture, bedding, &c. contents of boy were consumed.

A letter dated Negro Jefferson, belonging to a boy engineer, now lying at Baltimore, committed suicide on Thursday night by cutting his throat with a razor. It is said that his motive for some days previous was very much depressed, but that he was free from fear and future disposition, the reason of his depression could not be ascertained.

The Southern Times, mentions that Mr. Mallory, a young gentleman, of Charleston, S. C. died suddenly, on the 1st inst. from the effects of a wound received in a combination, after death, a large tumor was found growing from his head, which had been the cause of his sickness his death.

The Rev. Dr. Bethune of MEDFIELD HOLMES.—In an advertisement in one of our exchange papers, we find a young lawyer advertising for a wife, and in the same breath a

ATKINSON'S SATURDAY EVENING POST.

PHILADELPHIA

Saturday, May 18, 1833.

LY'ON Country friends who exchange with the Saturday Evening Post, and have not yet advertised this year, will please copy or exchange from the present of the "Book of Nature," instead of the Casket or Port Folio.

The whole edition of the Casket, 1833, will probably soon be entirely exhausted without further aid.

The *Prisoners of Mexico*, now exhibiting at Washington Hall, Second Third street, deserves respectful notice, from every lover of the fine arts. The model of the Castle of Chapultepec, and the model of the city, are correct representations upon the various systems of fortification and engineering. The panoramic views of the city, are worthy of the pencil of Vanderlyn, from beginning to end, is deeply interesting. The exhibition is to be continued considerably, the fact, that in nearly all our liberty institutions, there is pursued a radical error in the ordinary system of instruction. It is the error that the error may be corrected in a way which will strike practical men. The error of the teacher, pupil, parent, and society at large. Hence it is necessary that the principle should be carefully, calmly, and deliberately examined and discussed.

Mr. Weld treats of the manual labor system of instruction by stating the following propositions. 1. The present system furnishes exercise entirely too much. 2. It furnishes exercise adapted to the mind only. 3. Its moral effect would be peculiarly happy. 4. It would tend to the cultivation of important practical acquisitions. 5. It would promote health and longevity. It would promote independence of character. 7. It would promote originality of mind. 8. It is adapted to render permanent all the manlier features of character. 9. It would afford facilities to the student in acquiring a knowledge of the sciences and languages, and greatly diminish the expense of education. 11. It would increase the wealth of the country. 12. It would unite literary and mechanical pursuits in the same individual, and thereby greatly promote the happiness of society. Finally, it would make the occupation of an individual the standard of his worth. 14. It would have a tendency to render permanent our republican institutions.

"The distinguishing peculiarity of this institution is, that every student defrays the expenses of his board and tuition by the labor of his hands. This system unites so intimately the labor of the head with that of the hands, that neither interferes with the other, in the slightest degree, which is made of the basis of the whole. The former, they are devoted to healthful and profitable employment; in the latter, to the acquisition of that opinion of the student."

The terms and conditions are established by the author's own observation and experience, and the experience and observation of other literary men, and generally approved of and commended with success.

Little's *Museum*, for May, is, perhaps, one of the best numbers issued for several months, and a promise is made to render the June number still better. The articles entitled "Some parts of the American Character," from the British Critic, is a sensible and well-timed essay upon English travellers and American citizens. Capt. Beck's Arctic Expedition, just started from Montreal, is illustrated in unqualified terms by the New Monthly, and a strong article on Texas is brought to bear upon the question. Captain Parry has published a volume of his Arctic Expedition, latitude, but, after the most heart-breaking efforts, unable to reach the goal, through a reward of £10,000 awaited the accomplishment of that enterprise. How then can Capt. Beck, so much less favored than Capt. Parry, expect to succeed? There are two other articles on Arctic Expeditions, one by our friend Sawyer, "Mann's Sketches" and "Stuart's North America;" more Conversations with Lord Byron, by Lady Blessington, of whom a very pleasing full length portrait is given; a History of the Wesley Family and remarkable it is—with a multitude of other reading—poetry and prose, a variety of flowers, with pleasant bend in the country, would cover above all others, could be but once lay hands on a single number of the Museum, by way of experiment.

Part third of the Bridgewater Treatises on the power, wisdom, and goodness of God, as manifested in the animal creation, has just been published, in a volume of 320 pages, by Messrs. Carey, Lea & Blanchard. It embraces the subject of Astronomy and general Physics, and is certainly one of the most interesting volumes that has been issued from the press for a long time. The author, in reference to the various sub-divisions of the treatise, says:

"In the first of these I have endeavored to show, that the wisdom of God is displayed, in the whole and in every part of the day, as appears by their changing their places in the heavens, and presenting, at each hour, what appear to be successive to the same hours, and indicating, by their motions, the external progress of time. Other flowers, by their opening and shutting, progress with the weather. Plants of the same kind, as observed by Linnæus amateur flowers, as being regulated by temperature, and others, as Linnæus observed, by the length of the day. Some open in the morning and others in the evening and during the night; and the closing of one hour after the opening of another. In the tropical regions, where the days and nights are of equal length throughout the year, and invariably consist of twelve hours each, the flowers open and shut at different seasons. But there are other plants which open and shut at different hours of the day in the course of the year, being always of equal length at the same season, and presenting, at each hour, a new and positive hour of the day. Such plants clearly point out the periodical changes of time, as the period of the motions above described, did not depend upon the alternate succession of day and night."

Some curious experiments on this subject were made by Decandolle. He kept certain plants in two cellars, one constantly dark and the other lighted by lamps. On some of the plants the brilliant light appeared to have the effect of *accelerating* their movements, *convolvulus canarious, stolen fruticosus*,) and closing. The night-blowing plants appeared somewhat disturbed, but not materially affected by the constant darkness. In other conditions they accelerated their going on much, that of *nicotiana glauca* by one hour and a half, and thus exchanged night for day as their time of opening. Other plants, as the *cereus grandiflorus* night, (*convolvulus purpureus*.) In like manner those plants which live only a single day, and therefore cannot be affected by this mode of treatment. The smells of flowers seem to increase in the night before, without regarding either artificial light or heat. Jessamine and tuberose perfume more powerful at the same times, and illuminated during the night, but in three days accommodated herself to the artificial state, opening in the evening, and closing in the morning; restored to the open air, she recovered her usual habits.

Messrs. Carey and Hart, have published in two volumes, a work called "the Island." It is composed of "a tale, scraps, and tragedy," and "The Lunatic." These are well told and interesting.

The Charlemagne, at New York from Havre, has brought back the draft, drawn by the Secretary of the Treasury, on the French Government, protested.

The First Annual Meeting of the Philadelphia Society for the Promotion of Agriculture, will be held at the Hall of the Franklin Institute, Seventh street, below Chestnut, on Saturday, the 25th inst. at 12 o'clock, M. when the Annual Report will be read, and the Officers elected for the ensuing year.

By order of the Board of Managers.

JOHN CRERAR, Secretary.

Association of Teachers.—A Stated meeting will be held on Saturday, the 25th inst. at 10 o'clock, A. M. at the Hall of the Franklin Institute.

J. COXHEAD, Rec. Sec.

MARRIAGES.

On Tuesday evening, 14th inst. by the Rev. Mr. Winchester, Mr. William L. Drake, formerly of Mobile, Alabama, to Miss Mary Bonsall, of this city.

We have excellent reason for tendering to the happy couple our best wishes for their continued prosperity and happiness as well the numerous notices we have handed *Round Table and Mediator*, of their marriage, which they have omitted to chronicle. These are unpleasant things to have done as this kindness, to render our compliments, as we are not paid for them, so that, we offer the following, trusting that they may own value Miller's beautiful sentiment.

"Here love his golden shafts employs, here lights His purest fire, and wears his purple wings: Here sighs no more, but joyous kisses sip, And weeps for nought but pleasure's excess."

On the 16th inst. by Leonard Knight, Esq. Mr. Edward Knight, to Miss Hannah Knight, daughter of Mr. Sylvester.

On the 14th day, the 25th ult. Mr. John B. Hoops, of Brighton, Beaver co. Pa. to Lydia Gibbons, of Salem, Columbiana co. Ohio.

By the Rev. George Chandler, Mr. John Dollar, to Miss Ann Dollar.

At Newark, N. J. on Wednesday evening, the 8th inst. by the Rev. Mr. Richmond, Mr. Benjamin Mc. Holsted Holden, to Miss Eliza, daughter of Mr. Halsey, Esq. both of Newark.

On Tuesday evening, 7th inst. by the Rev. Mr. Sibl. Mr. Thomas Cellers Sparks, to Miss Elizabeth Cooper, both of this city.

On Thursday, 9th inst. by the Rev. Mr. Chambers, Mr. Thomas Cooper, to Miss Elizabeth Ann Hall, all of this city.

On Thursday, 9th inst. by the Rev. Mr. Cummins, Mr. Joseph Cummins, eldest daughter of Mr. Joseph Cummins, all of this city.

On Sunday, 5th inst. by Alderman Geyer, Mr. Frank Ellis, to Miss Eleanor Turner.

On Monday, 6th inst. by Alderman Geyer, Ebenezer Shoemaker, to Miss Catharine Rumpf.

On the 16th inst. by Alderman Barnaby, in the Mayor's Office, Mr. Benjamin Alexander, to Miss Elizabeth Ann Kennedy, both of this city.

On the 16th inst. by Alderman Barnaby, in the Mayor's Office, Alexander L. Kennedy, of Philadelphia, to Miss Ann Elizabeth Kennedy, daughter of Joseph Kennedy, Esq. of Baltimore.

On Thursday, 9th inst. by the Rev. Mr. Miller, Mr. Joseph Hall, to Miss Eliza Ann Hall, both of this city.

On Friday evening, 10th inst. by the Rev. Mr. Kirk, Mr. Joseph Lybrand, Mr. Thomas Collins Sparks, to Miss Rebecca Ann Hall, all of this city.

On Tuesday evening, 7th inst. by the Rev. Mr. Hill, Mr. Thomas Collins Sparks, to Miss Rebecca Ann Hall, all of this city.

On Thursday, 9th inst. by the Rev. Mr. Chambers, Mr. Thomas Cooper, to Miss Elizabeth Cooper, both of this city.

On Thursday, 9th inst. by the Rev. John Chambers, Edward Ravell, to Miss Elizabeth Cooper, all of this city.

On Thursday, 9th inst. by the Rev. John Chambers, Edward Ravell, to Miss Elizabeth Cooper, all of this city.

At Jersey Shore, Pa. by the Rev. J. H. Cyrus, Chas. Hasler, Esq. Assistant Engineer, to Miss Elizabeth Gardner, all of Jersey Shore.

At Newburg, on the 1st inst. by the Rev. A. Brunson, Mr. Jacob C. Kaufman, to Miss Rachel Ann Reading, Pa. on the 3d inst. by the Rev. Mr. Mills, Mr. Jacob Hill, to Miss Julia Ann Kershaw, daughter of Mr. John Hinold, merchant, of Philadelphia.

On Friday evening, 10th inst. by the Rev. Mr. Kirk, Mr. Joseph Lybrand, Mr. Thomas Collins Sparks, to Miss Rebecca Ann Hall, all of this city.

On Tuesday evening, 14th inst. by the Rev. S. H. Cox, Mr. Thomas Wilson, to Miss Mary Ann Hall, all of this city.

On Thursday, 9th inst. by the Rev. Mr. Cummins, Mr. Joseph Cummins, eldest daughter of Mr. Joseph Cummins, all of this city.

On Sunday, 5th inst. by Alderman Geyer, Mr. Frank Ellis, to Miss Eleanor Turner.

On Monday, 6th inst. by Alderman Geyer, Ebenezer Shoemaker, to Miss Catharine Rumpf.

On the 16th inst. by Alderman Barnaby, in the Mayor's Office, Mr. Benjamin Alexander, to Miss Elizabeth Ann Kennedy, both of this city.

On the 16th inst. by Alderman Barnaby, in the Mayor's Office, Alexander L. Kennedy, of Philadelphia, to Miss Ann Elizabeth Kennedy, daughter of Joseph Kennedy, Esq. of Baltimore.

On Thursday, 9th inst. by the Rev. Mr. Miller, Mr. Joseph Hall, to Miss Eliza Ann Hall, both of this city.

On Friday evening, 10th inst. by the Rev. Mr. Kirk, Mr. Joseph Lybrand, Mr. Thomas Collins Sparks, to Miss Rebecca Ann Hall, all of this city.

On Tuesday evening, 14th inst. by the Rev. S. H. Cox, Mr. Thomas Wilson, to Miss Mary Ann Hall, all of this city.

On Thursday, 9th inst. by the Rev. Mr. Chambers, Mr. Thomas Cooper, to Miss Elizabeth Cooper, both of this city.

On Thursday, 9th inst. by the Rev. John Chambers, Edward Ravell, to Miss Elizabeth Cooper

THE OLIO.

Haste thee, nymph, and bring with thee
Jest and youthful jollity;
Sport that wrinkled care divides,
And laughter, holding both his sides.

THE OLD BACHELOR.

Not a laugh was there, nor the sign of a smile,
As our friend to the bridal was ushered;
We thought of the pain he would suffer the while,
For he looked so sad—sadly agitated.

We saw him stand up, and we pitied him too,
As the person the groom had selected;
He trembled so much, and his cheek was so blue,
That we feared the poor fellow was dying.

We escorted him home that brightening day,
When pale from his bridal returning—
We spoke but few words, and most sorely did grieve,
The bachelor had no more discerning.

The fellow's mind as the devil, we said,
He knew that we said it in sorrow;
We cheered him, but sighed to think that his head
Would wofully ache on the morrow.

And who would have thought that one like him,
So shy of the girls had we found him,
Would ever have had his eye sight so dim
As to fall in the noose that bound him!

'Twas sad to see all as sadness could be,
That adieu'ps was wo'd been giving,
The bachelor's mind was most sorely did grieve,
The bachelor had no more discerning.

The fellow's soul
